

# HIGH AND DRY

BOAT LIFTS

- Unrivalled Stability And Simplicity
- No Holes Under The Waterline
- Lifts In A Horizontal Plane
- Fastest Launching Time
- Aesthetically Pleasing
- No Moving Parts On Float
- No More Galvanic Corrosion
- No More Antifouling
- Positive Buoyancy
- Built Tough

# HIGH AND DRY

BOAT LIFTS

**Patented South African designed and engineered dry boat storage solution aimed at making boat storage affordable and user friendly so everyone can use it.**

The High and Dry Boatlift was designed and engineered after nearly three years of building and developing boatlifts by a South African mechanical engineer. Hence its simplicity and foolproof workability is unrivaled in the international industry. Its siphoning lifting and lowering technology is the only of its kind in use and will be setting the trend for the future. This boatlift addresses all the drawbacks of current lifts in the industry and is engineered to last in South African waters.

Driving onto the lift is easier than driving onto a trailer. The four floatation bins act as guides with center guides installed if required. By attaching two mooring lines from the back bins onto your center cleat, locates the boat in the correct position every time.

By simply attaching the blower pipes to the bottom fittings and starting the pumps, the siphoning system is started which will gently launch your boat in a controlled horizontal plain in no time. By attaching the hoses to the top connectors and switching on the blowers, raises the boat in a controlled horizontal plane in no time. Optional automatic system available – No need to manually switch between top and bottom fittings.

The blower box can be mounted permanently on the dockside or it can be stored in a dock box.

High and Dry Boatlifts - Specifications			
Lift Capacity	Min. Boat Length	Max. Boat Length	Max. Draft
1000kg	3m/10ft	5.1m/17ft	450mm
1400kg	4m/13ft	6.5m/21ft	450mm
1900kg	4m/13ft	6.5m/21ft	550m
2300kg	5m/16ft	7m/24ft	550mm
2800kg	5m/16ft	7m/24ft	550mm
3400kg	5.5m/18ft	8.5m/28ft	700m
4200kg	5.5m/18ft	8.5m/28ft	700m
5000kg	6.5m/21ft	9.75m/32ft	700m
5500kg	7.5m/24ft	10.5m/34ft	700m
6000kg	8.5m/28ft	11.5m/38ft	800m
7500kg	8.5m/28ft	11.5m/38ft	800m
